

Plan for your SUCCESS in 2012

2012 Winter Coding Conference Series

January 6th

2012 CPT and ICD-9 Coding Updates

Awareness of annual coding updates and their application to your specialty is an essential element of maintaining your coding knowledge and certification. New CPT and ICD-9 codes will be reviewed and taught according to the AMA and AHA guidelines.

January 13th

Advanced Coding Skill-Building

Certified coders who seek to enhance and improve in their coding skills can participate in a hands-on workshop toward building an advanced level of CPT and ICD-9 coding skills. Bring your coding books and be ready to roll up your sleeves and code!

January 20th

Maximizing Physician Reimbursement

Health insurance options require a specialized area of knowledge to understand third party payers, types of plans, impact on patients and practice receivables and benefit provisions. After a thorough class on health insurance, attendees will complete this seminar by identifying the reimbursement "holes" and how medical billers and coders can make a positive impact on collections.

January 27th

ICD-10 Training and Workshop

Taught by an AAPC approved ICD-10 instructor, this course will begin your preparation for ICD-10 comprehension. Material will cover the ICD-10 guidelines, code sets and application through a hands-on workshop. *The Ingenix ICD-10-CM Official Draft Code Set book will be referenced for the training. This book may be purchased for \$110.00 at the time of registration or attendees may bring their own copy. Books will not be available for purchase at the seminar.*

6 CEUs per Seminar!

The more you attend, the more you save!

1 seminar @ \$200 / 2 seminars @ \$350 / 3 seminars @ \$450 / 4 seminars @ \$500
